

MVC EAGLE BEACH RESORT ARUBA

The impact of environmentally sustainable conscious purchasing goes beyond reducing costs. At MVC Eagle Beach Resort, we purchase sensibly and responsibly. We will not only be benefiting ourselves but also assist with our community and the environment.

It is important to sustain the local market. We purchase locally, hire contractors and support local importers and exporters whenever possible. However, we also purchase by taking environmental criteria and fair-trade principles.

The MVC Eagle Beach Resort will keep the following guidelines to effectively implement this policy:

- The resort will trade in a fair way to make a positive social, economic and environmental impact, by doing this, the resort will not maximize their profits at the expense of marginalized small producers.
- The resort will not accept products that have been created using child labor and forced labor.
- Illegal products will not be bought or sold on property. This including products made from endangered species.
- The resort will ensure that the products procured are the most environmentally friendly alternative available within budgetary limits. We ensure this by screening all the products and services we have.
